THE ESTABLISHMENT...

In 1947 August Lindner began to develop products for collectors and over the following years continued to expand these. What started as a small company with only a few products and co-workers has developed into a mid-sized global business with a considerable product range and variety; committed to unholding tradition and also innovating new ideas. The first coin album available in Germany is still a treasured LINDNER product to this very day. The hingeless (falzlos) system, the T-products and last but not least, the LINDNER coin boxes, are all inventions “Made by LINDNER” which have found their place in the world of collecting. The continual enhancing of the portfolio by working together with collectors and dealers a-like, has made LINDNER a household name in collector’s circles.

In 2006, just about 60 years after the company’s founding, the families 4th generation took over the management of the LINDNER business and is now leading this internationally established enterprise in its unchanged title. Our primary commitment is still offering high-quality, safe, beautiful and practical conservation of collector’s objects. Since its founding, the company’s headquarter is in Schömberg near Balingen in the Zollernalbkreis. Through a network of domestic and foreign dealers and distributors, we are represented nationally and internationally, enabling us to offer our products worldwide.

THE CLAIM...

Our principal goal to support you in your collector’s passion is assured through our high-quality standards. We see quality control in production and deliveries as a responsibility and self-evident. A large range of our products are still either self-produced or manufactured in German and European companies, which guarantees us a fast and efficient access to product and quality control. OCTO COIN CAPSULES FOR COINS Ø 14 - 41 mm

Made in EU

Format:
50 x 50 mm

COINS OF DIFFERENT SIZES IN ONE COLLECTION SYSTEM

From pennies to gold coins – all in one system. This is a collecting and presentation system in order to protect coins of different diameters in coin capsules and at the same time present them elegantly in coin boxes, coin cases or coin pages. One "Coin OCTO" consists of an octagonal distance disc made of high-quality acrylic glass with an outside measurement of 50 x 50 mm and a corresponding LINDNER coin capsule. The distance disc has to be placed between the bottom and lid of the corresponding coin capsule. By this the different coin diameters are evened out. The LINDNER coin capsules are extremely scratch resistant and provide the perfect protection and a "crystal clear" view of your coins.

LINDNER T-SYSTEM

Each page of the LINDNER T-system is made of a PERMAPHIL®-cardboard page and a hard-PVC-foil sheet which is fixed on the left side of the page. The foil sheets are softer and acid free. You can choose between many variations of insertion strips in different heights and widths. The stamps are inserted into the foil strips and are thereby protected on both sides. Due to the quality of the foil, you always have a “crystal clear” view of your stamps. The gentle clamp effect of the foil seam, which is produced by a special foil welding process, ensures that the stamps stay at their intended place. The foil sheet is glued on the cardboard sheet by a special adhesive process at the left side. This allows a simple leafing. Because of this, you can easily have a look on the front and the rear of the stamps without taking them out of the foil sheet. This is a typical character of the LINDNER T-system. The high-quality of material and production ensure an easy remove of the stamps, without the fear of damage. All pages of the LINDNER T-system have 18-ring hole punch, which gives them a sturdy hold in all LINDNER ring binders with 18-ring mechanism. The LINDNER ring binders can be found on page 72-74.

LINDNER T-ILLUSTRATED COUNTRY ALBUMS

Illustrated stamp pages were developed for those collectors who like to collect certain or several countries, with the entire stamp issue years. The stamps are depicted on the card pages and provide a fixed place for the stamps. This helps to portray each issue. Our employees in the LINDNER philatelic department collect and process issued stamps of over 150 countries for you. For those who collect internationally, there is no way around using our illustrated pages. They ensure that our collector owns the complete collection. Stamps will illustrate events of a country, they inform you about parts of the world, organisations and communities, allow insights into cultures and tell of highlights in history, politics and science. Stamps allow you to experience international events up close. The illustrated pages provide anticipation for stamps which have not yet been issued, and tell you which stamps still need to be found. Place the stamp in the provided place in the foil sheets. You can lay the stamp directly over the stamp illustration on the page. The stamp now lies entirely protected by the sheet foil. Each year, supplements are issued for the previous year, ensuring that your collection is always up to date.

LINDNER DOUBLE T-ILLUSTRATED PAGES

The LINDNER double T-illustrated stamp pages were developed for collectors, who wish to collect the new stamps as well as used stamps and do not want to purchase two sets of illustrated pages. The stamps are printed on both back and front side of these card pages. The foil sheets are glued on both front and back of the page, so that you can keep the new stamps on the front side and the used stamps on the reverse.

The beginnings of the album productions in Schömberg around 1950.

LINDNER T-BLANK AND LINDNER DT-BLANK-SYSTEM FOR THE TOPICAL OR THE CREATIVE INDIVIDUAL COLLECTOR

This system offers countless possibilities for the individualists and creative collectors who like to design their own stamp collections. Unlike the illustrated pages, these pages are not printed but remain blank. The LINDNER T-Blank-system has over 80 different page variations with different foil sheet strips for an individual set up of stamp collecting.

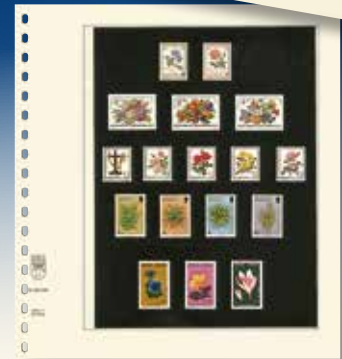

An advantage in the LINDNER T-Blank-system is that the stamps can always be removed or the page rearranged. The page will not be damaged and can be used to design a new collection. For collectors that like to add text or pictures, we offer the LINDNER write-up pages with many possibilities.

The write-up pages can be designed by hand or on the computer and are then placed between the card page and foil sheet, turning each page into an individual eye-catcher. The size of the write-up pages corresponds to the different kinds of T-Blank-pages.

LINDNER PAPER QUALITY

All LINDNER systems use the exclusive PERMAPHIL®-cardboard, which protects a stamp collection from the aging process and harmful environmental influences for decades. Impressive facts about our PERMAPHIL®-cardboard:

- a pH value of more than 7.5 which makes it acid free,
- age resistant due to a low calcium carbonate content,
- free of optical brighteners,
- free of acid-forming components,
- bleached without chlorine,
- firm album quality,
- paper weight: 200 g / sqm.

display in these frames. The material is very flexible and adapts completely to the surface of the objects and keeps them in place. From coins (in capsules) and stamps to writing utensils, watches, knives, decorations, photos, jewellery and other collectibles - with NIMBUS you can display your favourite objects in a special 3D frame!

Special production from 10.000 pieces.
Embossing possible from 100 pieces.

...HERE IS HOW IT WORKS:

Open the frame completely. Place the collectible on one of the two silicone membranes and close the frame. The object will be held in place by the surrounding silicone membranes, keeping it in its position. A magnetic closure holds the frame together!

INFORMATION FOR THE LINDNER ILLUSTRATED COUNTRY PAGES AND SUPPLEMENTS

ILLUSTRATED PAGES

Illustrated pages provide a full and complete overview of each country's issued stamps. LINDNER uses an acid-free, age resistant, and archival paper called "PERMAPHIL®"; the size is 272 x 296 mm. The firm, wood-free paper has an 18-hole perforation to fit all the original LINDNER 18-ring binders shown on pages 72-73.

Some of the illustrated albums are available in colour. These are marked in the following tables.

SUPPLEMENTS

Listed from page 124 are the yearly supplements for all LINDNER-T illustrated country albums. They are published in the early summer of each year and contain the supplement pages for all stamps issued in the previous calendar year. Stamp collections can be kept up-to-date and the continuous quality of the supplements guarantee a perfect match to the pages previously purchased.

NUMBER OF PAGES

In the following index, the number of pages is the actual amount of illustrated album pages in one set (title pages excluded). However, all sets contain title pages and are included in the price.

LINDNER SINGLE PAGE INDEX

The page index lists the year as well as the MICHEL numbers and/or the catalog numbers for each illustrated page. The LINDNER-T page indexes starting in January 2000 can be found on the internet under www.lindner-original.de/en in the section "Flyers & Brochures". For each area of interest you can obtain the retrospective years on request.

IMPORTANT:

The following tables contain the supplement pages 2022. The supplements for 2023 will be issued in spring 2024.

SINGLE PAGES

Every LINDNER-T illustrated album page can be purchased individually. Please provide exact order information including album number, page number and year since single pages can not be exchanged or returned. Example: 1 x 120b-49 pages 15, 16, 17 year 1959. We recommend before purchasing a large amount of single pages, check if it is less expensive to obtain a complete set instead of individual years. Please contact us if you need assistance.
